Trout Fishing On Lake Taneycomo

203 miles 3.5 hrs

Fishing Reports & Info

LilleysLanding.com

Phil Lilley talked at TFF Nov 12, 2015. Said he had special room rate thru Feb.

OzarkAnglers.com

Lake Taneycomo was formed with the completion of Powersite Dam in 1913. It was originally a section of the White River, and although Taneycomo is now technically a lake, it retains the look and feel of a river. When the Table Rock Dam was completed at Taneycomo's headwaters in 1958, the nature of the lake changed. Taneycomo's water now comes from the bottom of Table Rock Lake, making it a cold water lake.

The cold, clear water, stocked annually with approximately 750,000 10-12" rainbow trout, makes Taneycomo a world-class trout fishing lake year round. The cold, clear water combined with the Shepherd of the hills trout hatchery has made it the perfect spot for rainbow and German brown trout. About 80% of the 1,200,000 trout raised at the hatchery each year are released into Taneycomo. The upper end (restricted area) of the lake offers superb spin fishing and fly fishing for both quality and quantity of trout while the rest of the lake offers superb lure and bait fishing for numbers of fish. There is an artificial only regulation as well as a slot limit in the restricted area, but the rest of the lake has no length or lure restrictions, but is under state wide regulations.

Terrestrials have been really good on Taney lately if you have a boat. Got some friends who are locals there and they have been catching some nice Browns that have moved up due to the heavy flows and starting to stage up for the spawn.

Lake Taneycomo Facts

22 miles from Table Rock Dam to Powersite Dam

Average water temperature 48° F year round

750,000 trout stocked each year

Limit of four fish per day per trout permit

Average elevation 698 to 704 feet

2,080 service acres

Flood gates are capable of releasing 500,000 cubic feet per second.

Accessible from historic downtown Branson, the Branson Landing and at multiple points east including the communities of Rockaway Beach, Forsyth and Powersite and south of Hwy. 76 in Hollister and the Fall Creek area.
